RI1FJL Franz Josef Land -update by Vasily R7AL

According to the forecast ice conditions, and logistical / bureaucratic issues, our skipper insisted on a change of dates for **RI1FJL** DXpedition. New departure date is **7th of August**. We expect to arrive on the island on **August 15th**.

We have finally received written permission from the Polar Observatory management. They allowed us to stay on their base and use all the facilities, including electricity. It costs another 6000\$.

Our DXpedition cargo is in Murmansk already. It's 500kg of equipment. Another 300kg will be delivered with the team-members, excluding personal belongings.

Food and drinking water for the entire 30+ day long voyage will be purchased just before departure.

A huge Thanks to all Clubs, Foundations and Individual Donors who already supported our DXpedition. RI1FJL team really appreciate your Support! We raised \$8000 so far which is a really awesome help for us! At the same time, our budget deficit is still very significant.

Stay tuned for more news on DX-World – official trusted media outlet for the **RI1FJL** DXpedition.

VK9XY Christmas Island 2026 -update

The Pacific Islands DXpedition Group (PIDXG) in partnership with Youth on the Air is proud to announce FlexRadio as a major sponsor of the VK9XY Christmas Island DXpedition, reinforcing a shared commitment to innovation, technical excellence, and developing the next generation of DXpedition leaders.

For the VK9XY DXpedition, FlexRadio is providing four Aurora 500-watt software defined transceivers. By combining a high-performance SDR with an integrated 500-watt amplifier into one compact unit, the Aurora reduces station complexity, weight, and shipping volume—critical advantages for equipment transported thousands of miles to one of the world's most sought-after DXCC entities.

The Aurora also simplifies station setup, improves reliability in remote environments, and allows operators to spend more time making contacts and less time managing equipment. These advantages are especially valuable for young operators participating in their first international DXpedition.

"At FlexRadio, we believe the future of amateur radio depends on creating opportunities for new operators to gain meaningful experience," said Lori Hicks, VP Sales & Marketing of FlexRadio .

"We're proud to support the Pacific Islands DXpedition Group because they are doing far more than activating rare entities—they are mentoring, educating, and inspiring the next generation of DXpeditioners. Today's young operators will become tomorrow's expedition leaders, and we're honored to help provide the technology that makes those experiences possible."

Base Pieter J Lenie Field-Copacabana (USA)

Refuge Republica del Ecuador (Ecuador)

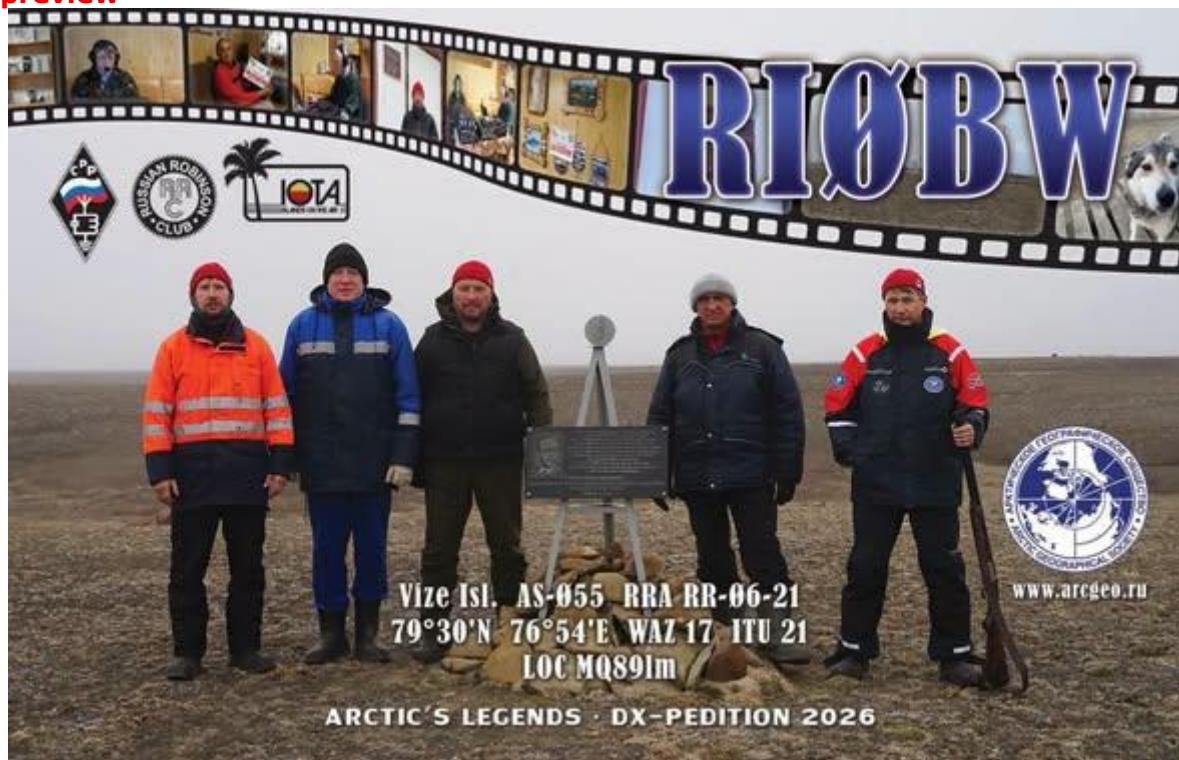

Base Arctowski (Poland)

Admiralty Bay is a large, open and windy area with bad soils for anchorage, so not a good place for sail boat stopovers. That means, I won't be able to be QRV from all these entities, but from 1 at least I hope, maybe 2 or 3 in case of very good weather window.

As a French expedition, we must submit soon the exact sites to get landing permissions from TAAF administration (Terres Australes et Antarctiques Françaises) which is the French representative of the Antarctic Treaty.

Feel free to report your TOP 3 most wanted base entities on the list above, and I will do my best without any guarantee of success.
