XR0Z Alexander Selkirk Isl SA-101 -update by Felipe XQ7IR

Early on Tuesday, September 8, we received excellent news: part of our expedition gear has successfully arrived at Alejandro Selkirk Island (SA-101).

Our fuel, a Honda EU22i generator, and several antennas specifically selected for this operation have already been unloaded in the village of Selkirk, where they will remain safely stored until our arrival in the coming weeks.

The expedition team is very excited after reaching this important milestone. After several months of careful planning and coordination, especially regarding the complex logistics of reaching such a remote location, we are pleased to report that everything is progressing "according to plan."

3W9C Hon Son Island AS-128 -by Jacek SP5APW

Due to my travel itinerary, I will be going QRT on 11 September at approximately 05:00 UTC. However, there is a possibility of remaining QRV on the 6m band a bit longer – until 11:00 UTC. So far, I have logged 1600 contacts. Most of the time, I am receiving signals primarily from Asia (JA/BA). QSO's with Europe account for only 9%, and those with NA for 5% (mainly the West Coast). Unfortunately, I haven't managed to make a single contact with the East Coast. My signal is weak, so I am operating mainly using FT8. Two days ago, I tried operating on SSB, but even strong stations from Japan called me rarely, while on FT8 they created a massive pile-up. The 6m log includes over 100 QSO's with JA/BA as a basis. I hope to experience a 20m opening to EU/NA tonight as I did last night. Please cross your fingers for the US East Coast!

5W0AF Samoa -update by Jacek SP5EAQ

This time everything is on track! I depart Poland on Sept 16th for New Zealand. I've built in a 2.5-day layover in ZL specifically as a "safety margin" for my gear and baggage, just in case of delays. Fingers crossed that all goes well! I expect to land in Samoa on Sept 21st and will be QRV until Oct 12th. Strictly SSB. Expect to hear 5W0AF very soon! During the DXpedition I will be trying to send news and pictures to Tom SP5UAF and he will be updating the website with the most recent information.

RI1FJL Franz Josef Land -now QRT (September 6) by Slava OK8AU

Hello everyone! Yes, the on-air part of the expedition is over. At 00:30 (local) we boarded the yacht and set course for Murmansk. Right now I can see that we've left the ZFI archipelago. It immediately started storming. It got warmer in the cabins — we could breathe. When we got on the yacht, the temperature in the cabins was about 5 degrees. Steam comes out of our mouths, condensation drips from the ceiling, everything is wet. The crew of sailors waited for us for two weeks — something impossible!

The 2027 French Polar Team Expedition by Mehdi, F5PFP

I hope to be QRV from Admiralty Bay, King George island, South Shetland Islands in early 2027, Admiralty Bay is a large, open and windy area with bad soils for anchorage, so not a good place for sail boat stopovers . That means, I won't be able to be QRV from all these entities, but from 1 at least I hope, maybe 2 or 3 in case of very good weather window.

As a French expedition, we must submit soon the exact sites to get landing permissions from TAAF administration (Terres Australes et Antarctiques Françaises) which is the French representative of the Antarctic Treaty.

Feel free to report your TOP 3 most wanted base entities on the list above, and I will do my best without any guarantee of success.
